

## **IST 263 Project Milestone 6 – First Draft Using CSS**

**Name:** Ziyang Zhou

**Description:**

Please paste your project description from Project Milestone 1 here.

I'd like to make a webpage for a project I did last year about the street vending system in NYC (The project already had a website that uses the template from wix.com, I'd like to see if I can make a new webpage). The first page would be the home page of the project, introduce what it could do to the community. The second page would be the About Us page that introduce the mission and prospection of the project. The third page would cover the detailed phases of forming the proposed the new system, how it might function, and a detailed handbook attached to it. The fourth page could be a communication page for the community that street vendors in the project could post their experience and feedback on the website and would also have a contact and donation filed on the page. The fifth page is the donation page where people in the community and those who would like to help could make their contributions

**What is the url of the page you choose to work on for this part?**

<https://zzhou27-su.github.io/ist263/project/index.html>

**Paste a screen shot of the wireframe you created for this page below.**

**Provide the URL of the WAVE checker for this page below.**

<https://wave.webaim.org/report#/https://zzhou27-su.github.io/ist263/project/index.html>

**Provide the URL of the HTML validator for you page below.**

<https://html5.validator.nu/?doc=https%3A%2F%2Fzzhou27-su.github.io%2Fist263%2Fproject%2Findex.html>

**If something went wrong in this part, describe what happened and how you can fix it moving forward.**

**Examples of problems could be, page isn't responsive, page doesn't look like wireframe, etc.**

Page looks a little bit different when I opened it through link vs when I opened it on my local drive (everything got narrower). I am sure I updated everything to GitHub, so I am not sure what happened. I might need to change the padding and margin.
